THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
 or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 271 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 271 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Applicant Christopher S. Duncan, Reg. No. 64,287, on August 19, 2009.

The application is amended as follows:

Claims

1. (Currently Amended) In a computer network having three or more computing devices in communication, a method for managing data available for access on the network, the method comprising:

- obtaining, at a host computing device included as part of the computer network and associated with a user, a first user request to identify data corresponding to a set of criteria, the set of criteria including a unique security ID associated with the user;
- verifying authorization of the user to access the data corresponding to the set of criteria based on the unique security ID;
- obtaining an identification of data stored on the host computing device associated with the first user request and matching the set of criteria;
- automatically obtaining an identification of data stored on at least one computing device included in the computer network and matching the set of criteria;
- merging the identification of data stored on the host computing device associated with the user request and the identification of data stored on the at least one computing device included in the computer network;

generating a first user result from the merging of the identification of data stored on the host computing device associated with the first user request and the identification of data stored on the at least one computing device included in the computer network;

maintaining a record of the first user result;

obtaining, at the host computing device, a second user request to identify data corresponding to the set of criteria;

obtaining ~~[[an]]~~ a second user result identifying data associated with the second user request and matching the set of criteria, stored ~~either~~ on the host computing device;

querying ~~or on~~ any other computing device in the computer network available to identify data associated with the second user request in response to ~~[[a]]~~ the second user request;

~~while still in communication with the computer network,~~ determining that one computing device in the computer network that was previously searched as a result of the first user request is unavailable to identify data corresponding to the second user request;

generating a recalled result portion by recalling ~~the~~ a portion of the first user result containing data located on the one computing device that is unavailable during the second user request;

generating a substituted result by substituting the recalled result portion for results from the second user request of the one unavailable computing device; and

generating a merged result by merging results including a result from the any other computing device available to identify data in response to the second user request, the second user result, and the substituted result.

12. (Currently Amended) The method as recited in Claim 1, wherein generating a merged result by merging results including a result from the any other computing device available to identify data in response to the second user request, the second user result, and the substituted result includes generating visual cues corresponding to data not currently available to the user.

15. (Currently Amended) In a computer network having three or more computing devices in communication, a method for managing data available for access on the network, the method comprising:

obtaining a first user request to identify data stored on the three or more computing devices, wherein one of the three or more computing devices is a local computing device, the data corresponding to a set of criteria, the set of criteria including a unique user security ID;

automatically querying the three or more computing devices within the computer network to identify data stored on ~~the~~ local computing device storage locations associated with the unique user security ID on the three or more computing devices;

verifying authorization of the user, based on the unique user security ID, to access the data corresponding to the set of criteria;

merging results of the querying;

generating a first user result from merging results of the querying;

displaying the first user result ~~results~~;

maintaining a record of the first user result;

obtaining a second user request to identify data stored on the three or more computing devices;

transmitting the second user request to one or more available computing devices on the computer network;

obtaining a second user result identifying data stored on the one or more available computing devices in the computer network associated with the unique user security ID ~~identifier~~ and matching the

unique user ID in response to the second user request sent to the one or more available computing devices
identifier;

~~while still in communication with the computer network,~~ determining that one of the three or more computing devices previously searched as a result of the first user request is unavailable to identify data corresponding to the second user request;

generating a recalled result portion by recalling ~~the~~ a portion of the first user result containing data located on the one computing device that is unavailable during the second user request;

generating a substituted result by substituting the recalled result portion for results from the second user request of the one unavailable computing device; and

generating a merged result by merging the second user result and the substituted result.

27. (Currently Amended) In a computer network having a computing device directly associated with a user and at least two remote computing devices ~~device~~ in communication, a method for managing data available for access on the network, the method comprising:

obtaining, by the computing device directly associated with the user, a first request to identify data corresponding to a set of criteria, the set of criteria including a unique security ID associated with the user;

verifying authorization, based on the unique security ID of the user, to access the data corresponding to the set of criteria;

obtaining, by the computing device directly associated with the user, an identification of locally stored data matching the set of criteria;

transmitting, by the computing device directly associated with the user, the first request to the at least two remote computing devices ~~device~~ for an identification of data matching the set of criteria;

obtaining, by the at least two remote computing devices ~~device~~, an identification of locally stored data matching the set of criteria;

transmitting, by the at least two remote computing devices ~~device~~, the identification of locally stored data matching the set of criteria;

generating a first user result by merging, by the computing device directly associated with the user, data matching the set of criteria stored on the device directly associated with the user and the at least two remote computing devices ~~device~~;

maintaining a record of the first user result;

obtaining, by the computing device directly associated with the user, a second user request to identify data corresponding to the set of criteria;

transmitting, by the computing device directly associated with the user, the second user request to any available remote computing devices on the computer network to identify data corresponding to the set of criteria;

obtaining, by the computing device directly associated with the user, a second user result comprising an identification of data stored locally matching the set of criteria and data stored on the any available remote computing device that is still available to identify data in response to a request;

~~while still in communication with the computer network,~~ determining, by the computing device directly associated with the user, that one remote computing device that was previously searched as a result of the first user request is unavailable to identify data corresponding to the second user request;

generating a recalled result portion by recalling, by the computing device directly associated with the user, the portion of the first user result containing data located on the one remote computing device that is unavailable during the second user request;

generating a merged result by merging, by the computing device directly associated with the user, the second user result and the substituted result.
